metrics signal type *(continued)*
open standards for backends 116
overview 26–28
telemetry 29–31
vs. traces 172
metrics signal type. *See* service level objectives
microservices app examples 6–10, 160–169
Microsoft Power BI 130
monitoring versus observability 5
MySQL 58

N

Nagios 77
Nagios Core 105
Netdata 105
network abstractions 62
networked filesystem in cloud storage 60
network interfaces 61
network-related sources 45
network-related stores 61–63
New Relic 138, 187, 209
Nightingale 105
Nobl9 208
nonfunctional requirements (NFRs), agent 93
NoSQL datastores 58–59

O

object stores 60
observability 1–12
challenges addressed 10–12
definition 2–4
importance for microservices 159
microservices app 6–10
roles and goals 5–6
use cases 4–5

frontends 121–130
log backends 99
metrics 104–106
traces 107
OpenTelemetry
collector (agent) 81–90
correlation standards 222
correlation with 213–215
instrumentation 64, 79–80
open standards for backends 116
overview 67, 77–78
real user monitoring 155
OpenTelemetry Protocol (OTLP) 81
OpenTSDB 105
Ops Agent, Google 91
orchestrator, container. *See* Kubernetes
OTLP (OpenTelemetry Protocol) 81

P

Parca 184, 187–189
pay-as-you-go model, serverless compute 56
performance
agent 92
auto-instrumentation impact 79
backend queries 117
monitoring 143–145
pipelines
Alertmanager 149–154
OpenTelemetry collector 81–83
Pixie 134, 185
platform operations, role of 6
portability 12
PostgreSQL 58
pprof 180–181
privacy and security, signal correlation 223
Prodfiler 187
production environments, continuous profiling in 195
product owner, role of 6
profiles, tracing 34
profiles. *See* continuous profiling
Prometheus 74–76
alerting 146–154
choosing backend for compatibility with 106
correlation example 217–220
lack of horizontal scaling 103
metrics collection 74–77
scrape configuration 85
SLO implementation 202–208
Promscale 105
protocol buffers (protobuf) schema 180
proxy sources 64
pruning logs 25
pull vs. push approach to metrics 27, 74
Pyroscope 185
Pyrra 203–207

Q

queries
backend 97, 117
cost of backend 115
distributed tracing costs 171
profiles 195
QuestDB 106

R

rate, errors, duration (RED) method, metrics 27
RCA (root cause analysis) 146
reachability monitoring 144
real user monitoring (RUM) 155
recording rules feature, Prometheus 75
