11.3 Problem description
Context for the DCC application
Design choices
11.4 Analysis and design
Operation flow and finite state machine
Contract diagram
11.5 Developing the smart contract
Data structures
Events
Modifiers
Functions
11.6 Local deployment
11.7 Automated testing using truffle
11.8 Developing the web application
UI design
Coding the app.js
11.9 Testing the DCC-Dapp
11.10 Public deployment
Deployment on Ropsten-Infura
Create web-client for distribution 28
11.11 Retrospective
11.12 Best practices
11.13 Summary
12 Blockchain: The road ahead
12.1 Decentralized identity
12.2 Self-managed identity
12.3 Consensus and integrity
Proof of work
Proof of stake
