10. An approved address buys an asset (transfer occurs).

    From Account4 (an approved account), enter the asset ID as `0` and the Account2 address as From in the Buy interface; then click Buy, and confirm.

    Asset #0’s ownership is changed to the address of Account4, as shown in figure 9.10.

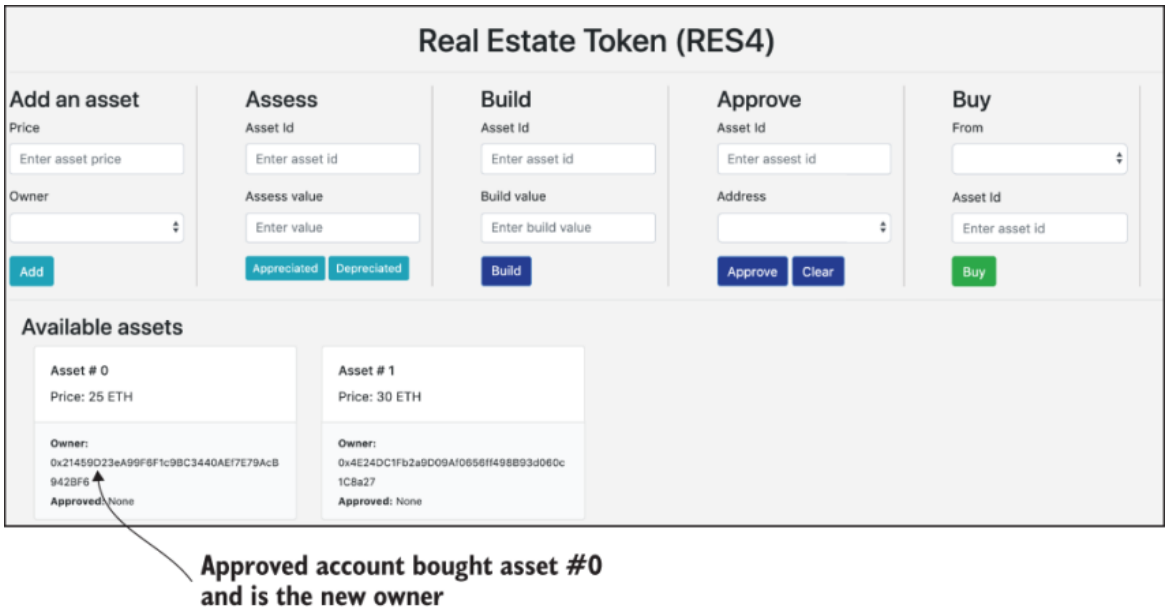

Figure 9.10 Asset #0 transferred to Account4

You can also review the account balances, as shown in figure 9.11 and also in the Ganache UI. The Ganache UI shows the balances of all the accounts involved in the transactions, with the appropriate values added and deducted from the respective accounts. Figure 9.11 shows Account4, whose balance has gone down from 100 ETH to 73 ETH after buying the asset #0 and paying for the Txs. As shown in the middle of figure 9.11, Account2’s balance is about 118--an increase from the initial balance of 100 ETH because it incurred fees for selling asset #0 and the transaction fees.
