14. Add two more assets to Account4 of the same value from Account1 in MetaMask.

    From Account1 (town supervisor's) in MetaMask, add an asset of value 10, choose Account4 as owner, click Add, and confirm.

    From Account1 in MetaMask, add an asset of value 10, choose Account4 as owner, click Add, and confirm.

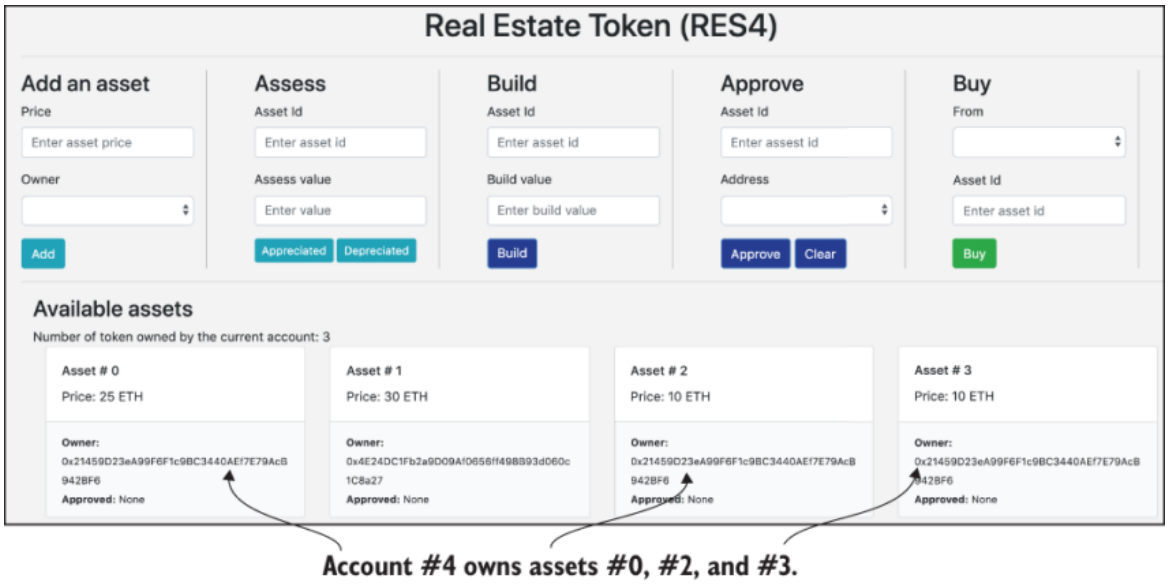

Figure 9.14 Account4 has three different assets (#0,#2,#3): ERC721 tokens

You see the newly added assets in the UI, as shown in figure 9.14. Even though the assets are of equal value, they are not the same. One could be a little red house, and the other could be a piece of land yet to be developed. A RES4 token is not the same as another RES4 token. In this case, Account4 (0x21459...) has three assets, each of which is unique. That is the fundamental characteristic of ERC721, an NFT (non-fungible token).
