5.4 Embeddings: Giving AI a sense of meaning 154
The restaurant menu analogy: A taste of embeddings 154
Using embeddings in practice: The Vercel AI SDK 158
Use case: IT support knowledge base 161

5.5 Going deeper into LLM techniques 164
Tree of thoughts 164 ▪ Self-refine 164 ▪ LLM-as-a-judge 164

6 *Building AI workflows with LangChain.js 166*

6.1 Introducing LangChain 167
Chaining calls with LangChain 168 ▪ Integration with the Vercel AI SDK 173

6.2 Preparing and storing documents for retrieval using LangChain 178
Document ingestion using text splitters 180 ▪ Introducing vector stores 181 ▪ Document retrieval 182 ▪ Full example of preparing and storing documents with LangChain 184

6.3 Using memory components in LangChain to remember conversation history 185

6.4 Utilizing agents in LangChain.js 188
How LangChain agents work 189 ▪ Creating an agent using LangChain.js 190 ▪ Agent integration with the Vercel AI SDK 192 ▪ Overview of LangChain.js modules 194

6.5 Going deeper with LangChain.js 194
LangChain Expression Language 194 ▪ LangGraph 195

7 *Document summarization and RAG with LangChain.js 197*

7.1 Building a document summarization web application with LangChain.js 198
Summarization app project requirements 198 ▪ Architecture and workflow 198 ▪ Building the document summarization web application 202 ▪ Caveats and limitations of document summarization 205 ▪ Demonstrating the app 208
Additional considerations for summarizing documents 212

7.2 Building a RAG web application with LangChain.js 216
RAG app project requirements 216 ▪ Key architectural components of RAG 217 ▪ Technical architecture overview 218
RAG system components 219 ▪ Web app demonstration 223
Adding grounding support 225
