PART 3 HANDS-ON PROJECTS 303

10 *Building an AI interview assistant: Project walk-through* 305

10.1 Overview of the application 306
Key features 306 ▪ Technical implementation 311 Technology stack overview 311

10.2 Security measures implemented 313

10.3 Challenges during development 313
State management considerations 313 ▪ Text-to-speech integration 314 ▪ Generating feedback 314

10.4 Additional considerations and improvements 315

11 *Building an AI RAG agent: Project walk-through* 317

11.1 Overview of the application 318
Key features 318 ▪ Technical implementation 322 Technology stack overview 322

11.2 Challenges during development 325
Shared vs. dedicated user data in vector stores 325 Security considerations around document management and heavy workloads 325 ▪ API design and URL structure to minimize information exposure 326

11.3 Additional thoughts on AI and the future of web development 327

PART 4 ADVANCED INTEGRATIONS AND THE FUTURE OF AI 329

12 *Integrating web apps with the Model Context Protocol* 331

12.1 Why the MCP matters for AI integration 332

12.2 MCP architecture 333

12.3 Connecting Next.js and the Vercel AI SDK with the MCP 334
Architecture overview 335 ▪ Building an end-to-end integration with the MCP in Next.js 336 ▪ Benefits of using the MCP for web applications with LLMs 340

12.4 Inside an MCP server: Extending web applications 341
MCP server structure 342 ▪ Additional considerations for MCP servers 345
