- *Node.js*—Version 18 or higher.
- `npm` *or Yarn*—For managing project dependencies.
- *Text editor*—Such as VS code.
- *Web browser*—Latest versions of Chrome, Firefox, Safari, or Edge.
- *API keys*—For various AI providers (e.g., OpenAI, Google Gemini), as demonstrated in the examples. Some examples may require paid API access for full functionality.

liveBook discussion forum

Purchase of *Build AI-Enhanced Web Apps* includes free access to liveBook, Manning's online reading platform. Using liveBook's exclusive discussion features, you can attach comments to the book globally or to specific sections or paragraphs. It's a snap to make notes for yourself, ask and answer technical questions, and receive help from the author and other users. To access the forum, go to https://livebook.manning.com/book/build-ai-enhanced-web-apps/discussion.

Manning's commitment to our readers is to provide a venue where a meaningful dialogue between individual readers and between readers and the author can take place. It is not a commitment to any specific amount of participation on the part of the author, whose contribution to the forum remains voluntary (and unpaid). We suggest you try asking the author some challenging questions lest his interest stray! The forum and the archives of previous discussions will be accessible from the publisher's website as long as the book is in print.
