- *Predefined template*—For users seeking immediate practice, we offer predefined templates, with the software engineer interview as a predefined option. See figure 10.3.

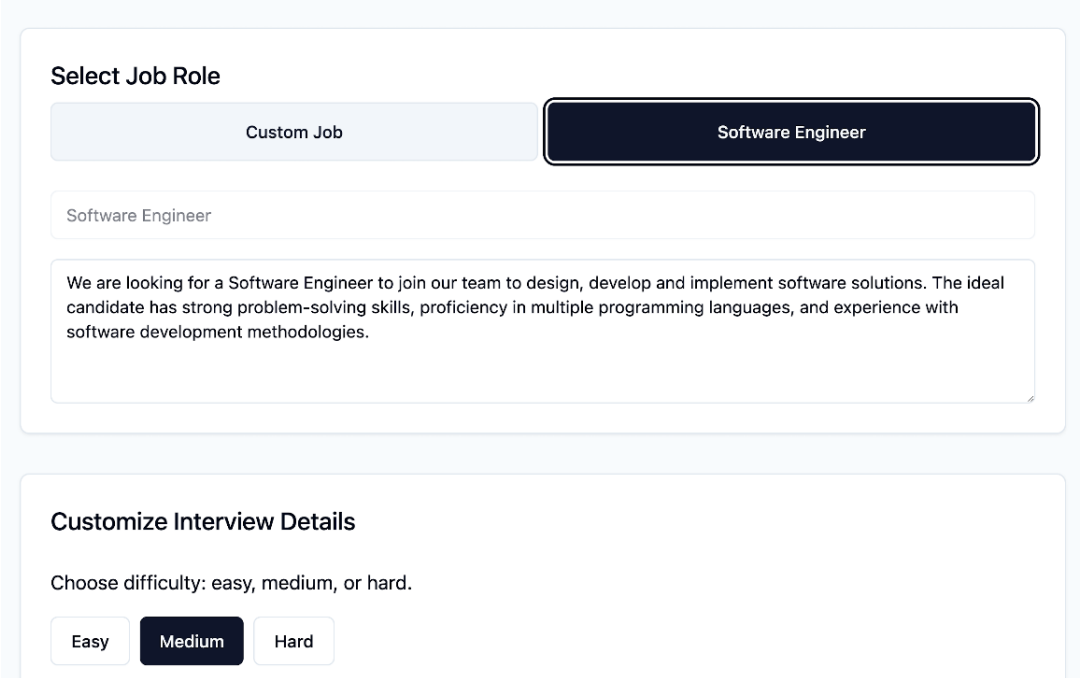

Figure 10.3 The predefined template for a typical software engineer job. You are free to modify as well.

INTERVIEW PARAMETERS CONFIGURATION

After selecting an interview type, users can fine-tune additional parameters, including

- *Number of questions*—Users can specify how many questions they want to tackle in a session, allowing for both quick practice sessions and more comprehensive mock interviews.
- *Difficulty level*—The difficulty setting adjusts the complexity of questions, enabling users to gradually increase the challenge as they improve.
- *Question types*—Users can select either behavioral, technical, or mixed question types.

Figure 10.4 shows a screenshot of the interview configuration section.

INTERACTIVE CHAT-BASED INTERVIEW UI

The interview interface itself is designed around a familiar chat-based UI. It has two key features:
