

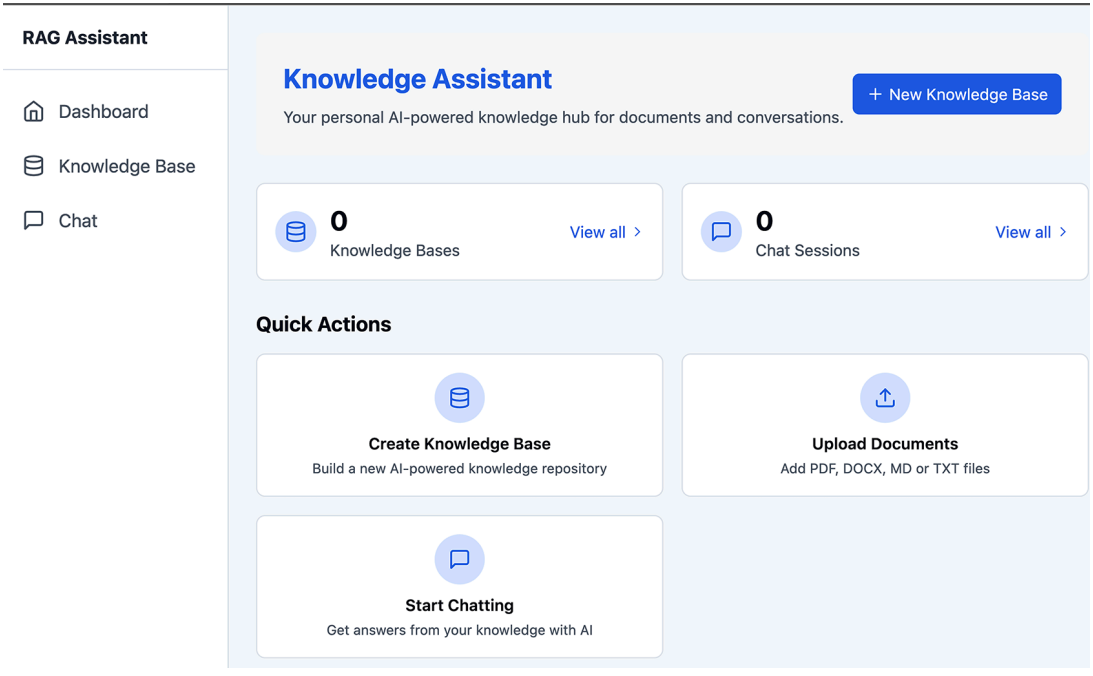

Figure 11.1 The main dashboard page contains a button to create a new knowledge base and useful quick action buttons.

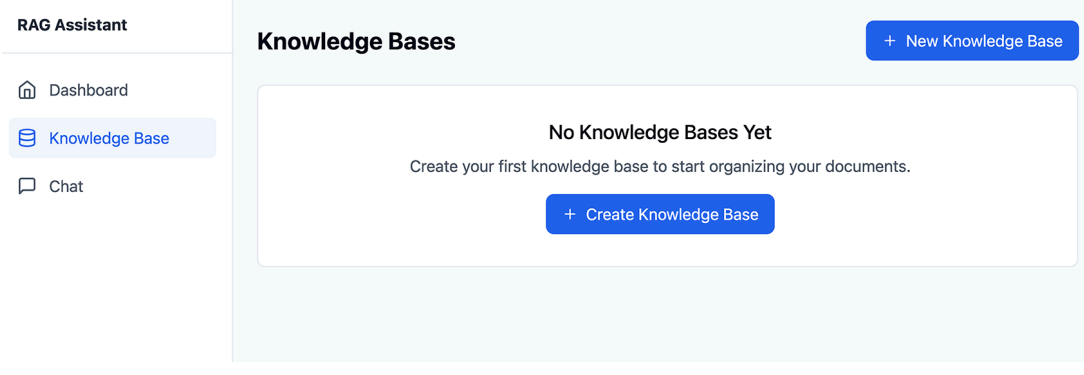

Figure 11.2 When the user clicks to review existing knowledge bases when none have been created, the application will inform the user that they need to create one first.

DOCUMENT UPLOADING

After creating a new knowledge base, users need to upload documents to enable conversational interactions with their content. The knowledge base details page provides an overview of the knowledge base along with a list of uploaded documents.
