generative AI web applications 41
prompts 142
strategies for AI applications 256–267
testing and debugging, Vercel AI SDK troubleshooting 241–250
checking official Vercel AI SDK issue tracker 245
common run-time errors 243
handling error states in AI-generated content 242–246
implementing robust error handling with user-facing fallbacks 243
managing token limits and rate limiting 246–250
model capability mismatches 243
model fallbacks 248–250
provider compatibility problems 242
retrying failed requests 247
text
generation 4–5
prompts 137
splitters 180
text-to-speech
API route 312
integration 314
threat model 270
tiktoken library 135
token count monitoring 247
tokenization 132
token limits 246
TokenTextSplitter 204
tool and function calling 121–125
implementing custom tools and functions with Vercel AI SDK 123–125
overview of 121
tool call messages 138
tools, defined 332
ToT (tree of thoughts) 164
trackVisibility prop 30
traffic-based requirements 292
transformer architectures 14
transformers, overview 14, 15
troubleshooting, LangChain.js 250–256
adding debug chains for monitoring execution steps 253
chain execution errors 251–254
enabling verbose mode in models or tools 252
missing integration problems 255
troubleshooting model integration problems 254–256
utilizing callback handlers 253
vector dimensions mismatch 254
wrapping execution with try/catch statements 251

U

UI design, defined 13
UI state management 103–113
implementing patterns 108–113
key components for 105–107
separating AI and UI state in React/Next.js applications 103–104
UIs (user interfaces) 7–8
generating and streaming components 98
React hooks for 68
updating to use server actions 96–98
unit testing, in React and Next.js 256
integration testing 258
overview of 257
upload route 324
Upstash Redis database 357
useActions hook 111, 112, 118
useAIState hook 111, 112
useChatFormSubmit hook 34, 35, 68–70
useChat hook 65, 68, 70, 78, 79, 340, 348
useCompletion hook 65, 68, 70
useContext hook 103
useEffect hook 34, 236
useInView hook 30
useIsAtBottom hook 30
useReducer hook 34
user input points 271
username/password 276
useState hook 34, 79, 103, 112
useUIState hook 111, 112
UX (user experience) 17, 26

V

validating AI-generated content 17
validation, server vs. client 271
variations in output 142
vector dimensions mismatch 254
vector stores 179, 181
shared vs. dedicated user data in 325
