vendor lock-in 54
verbose mode 252
Vercel
  dedicated providers 291
  example deployment to 294–299
Vercel AI SDK 55–61, 158–161, 122, 269
  agent integration with 192
  enhancing conversational UIs with multimedia content 79–86
  features and benefits of 55
  handling streaming responses with 61–72
  implementing custom tools and functions with 123–125
  integrating web apps with MCP 334–341
  integrating with LangChain.js 173–178
  practical integration with Astra AI 58–61
  storing and retrieving with embeddings 160
  strategic approach to integration 56–58
  structured data generation 113–121
  testing responses 260–264
  troubleshooting 241–250
  working with multiple AI providers 72–79
version control 139
versioning prompts 141
virtual DOM 28
VowelCount function 168–170

## W

WeatherCard component 124
web applications
  document summarization 198–216
    additional considerations for 212–216
    applying summarization chain and displaying to user 204
    architecture and workflow 198–202
    building 202–205
    caveats and limitations 205–208
    demonstration of app 208–211
    loading and preprocessing documents 203
    measuring cost of multiple LLM calls 207
    parsing and cleaning up documents 205
    project requirements 198
    splitting documents into manageable chunks 204
  generative AI 4–9
  prompt engineering
    chain-of-thought prompting 151–154
    embeddings 154–164
    example of 151
    general methodology for creating prompts 152
web apps
  AI tools and ecosystem 9
  generative AI in, generative vs. traditional AI 13–15
  integrating with MCP
    architecture overview 335, 346
    benefits of using MCP for web applications with LLMs 340
    building end-to-end integration with LangChain.js 347–349
    building end-to-end integration with MCP in Next.js 336–340
    connecting Next.js and Vercel AI SDK with 334–341
    frontend 348
    integrating MCP servers with LangChain.js 345–349
workflows, AI
  building with LangChain.js 166–178, 194
  chaining calls 168–173
  integration with Vercel AI SDK 173–178
  LangChain Expression Language 195
  LangGraph 195
  preparing and storing documents for retrieval 179–185
