A.6.1. Expanding the parameter pack

A.7. Automatically deducing the type of a variable

A.8. Thread-local variables

A.9. Summary

Appendix B. Brief comparison of concurrency libraries

Appendix C. A message-passing framework and complete ATM example

Appendix D. C++ Thread Library reference

D.1. The <chrono> header

D.1.1. std::chrono::duration class template

D.1.2. std::chrono::time_point class template

D.1.3. std::chrono::system_clock class

D.1.4. std::chrono::steady_clock class

D.1.5. std::chrono::high_resolution_clock typedef

D.2. <condition_variable> header

D.2.1. std::condition_variable class

D.2.2. std::condition_variable_any class

D.3. <atomic> header

D.3.1. std::atomic_xxx typedefs

D.3.2. ATOMIC_xxx_LOCK_FREE macros

D.3.3. ATOMIC_VAR_INIT macro

D.3.4. std::memory_order enumeration

D.3.5. std::atomic_thread_fence function

D.3.6. std::atomic_signal_fence function

D.3.7. std::atomic_flag class
