entries with no outstanding hazards. The next listing shows just such an implementation.

Listing 7.8. A simple implementation of the reclaim functions

```
template<typename T>
void do_delete(void* p)
{
    delete static_cast<T*>(p);
}

struct data_to_reclaim
{
    void* data;
    std::function<void(void*)> deleter;
    data_to_reclaim* next;

    template<typename T>
    data_to_reclaim(T* p):                    <-(1)
        data(p),
        deleter(&do_delete<T>),
        next(0)
    {}

    ~data_to_reclaim()
    {
        deleter(data);                        <-(2)
    }
};
```
