Postcondition

```
this->count()==duration_cast<duration<Rep,Period>>(d).count()
```

Examples

Std::Chrono::Duration::Count Member Function

Retrieves the value of the duration.

Declaration

```
constexpr rep count() const;
```

Returns

The internal value of the `duration` object, as a value of type `rep`.

Std::Chrono::Duration::Operator+ Unary Plus Operator

This is a no-op: it just returns a copy of `*this`.

Declaration

```
constexpr duration operator+() const;
```

Returns

```
*this
```

Std::Chrono::Duration::Operator-Unary Minus Operator
