Effects

```
internal_count+=other.count();
```

Returns

```
*this
```

Std::Chrono::Duration::Operator-= Compound Assignment Operator

Subtracts the count for another `duration` object from the internal count for `*this`.

Declaration

```
duration& operator-=(duration const& other);
```

Effects

```
internal_count-=other.count();
```

Returns

```
*this
```

Std::Chrono::Duration::Operator*= Compound Assignment Operator

Multiplies the internal count for `*this` by the specified value.

Declaration

```
duration& operator*=(rep const& rhs);
```

Effects

```
internal_count*=rhs;
```

Returns

```
*this
```
