Declaration

```
time_point& operator+=(const duration& d);
```

Effects

Adds `d` to the internal `duration` object of `*this`, as-if

```
this->internal_duration += d;
```

Returns

```
*this
```

Std::Chrono::Time_Point::Operator-= Compound Assignment Operator

Subtracts the specified `duration` from the value stored in the specified `time_point` object.

Declaration

```
time_point& operator-=(const duration& d);
```

Effects

Subtracts `d` from the internal `duration` object of `*this`, as-if

```
this->internal_duration -= d;
```

Returns

```
*this
```

Std::Chrono::Time_Point::Min Static Member Function

Obtains a `time_point` object representing the minimum possible value for its type.

Declaration
