Declaration

```
integral-type  atomic_fetch_and_explicit(
    volatile atomic<integral-type>* p, integral-type i,
    memory_order order) noexcept;
integral-type  atomic_fetch_and_explicit(
    atomic<integral-type>* p, integral-type i, memory_order order)
    noexcept;
```

Effects

```
return p->fetch_and(i,order);
```

Std::Atomic<Integral-Type>::Fetch_Or Member Function

Atomically loads a value and replaces it with the bitwise-or of that value and the supplied value `i`.

Declaration

```
integral-type  fetch_or(
    integral-type i,memory_order order = memory_order_seq_cst)
    volatile noexcept;
integral-type  fetch_or(
    integral-type i,memory_order order = memory_order_seq_cst)
noexcept;
```

Effects

Atomically retrieves the existing value of `*this` and stores *old-value* `|` `i` in `*this`.

Returns

The value of `*this` immediately prior to the store.

Throws

Nothing.
