Atomically loads a value and replaces it with the bitwise-xor of that value and the supplied value `i`.

*Declaration*

```
integral-type  fetch_xor(
    integral-type i,memory_order order = memory_order_seq_cst)
    volatile noexcept;
integral-type  fetch_xor(
    integral-type i,memory_order order = memory_order_seq_cst)
noexcept;
```

*Effects*

Atomically retrieves the existing value of `*this` and stores *old-value* `^ i` in `*this`.

*Returns*

The value of `*this` immediately prior to the store.

*Throws*

Nothing.

---

**Note**

This is an atomic read-modify-write operation for the memory location comprising `*this`.

---

**Std::Atomic_Fetch_Xor Nonmember Function**

Atomically reads the value from an `atomic<`*integral-type*`>` instance and replaces it with the bitwise-xor of that value and the supplied value `i`.

*Declaration*
