```
void wait();
```

Preconditions

`this->valid()` would return `true`.

Effects

If the associated state contains a deferred function, invokes the deferred function and stores the returned value or thrown exception as the asynchronous result. Otherwise, blocks until the asynchronous result associated with `*this` is *ready*.

Throws

Nothing.

Std::Future::Wait_For Member Function

Waits until the asynchronous result associated with an instance of `std::future` is ready or until a specified time period has elapsed.

Declaration

```
template<typename Rep,typename Period>
future_status wait_for(
    std::chrono::duration<Rep,Period> const& relative_time);
```

Preconditions

`this->valid()` would return `true`.

Effects

If the asynchronous result associated with `*this` contains a deferred function arising from a call to `std::async` that hasn't yet started execution, returns immediately without blocking. Otherwise blocks until the
