asynchronous result associated with `*this` is *ready* or the time period specified by `relative_time` has elapsed.

Returns

`std::future_status::deferred` if the asynchronous result associated with `*this` contains a deferred function arising from a call to `std::async` that hasn't yet started execution, `std::future_status::ready` if the asynchronous result associated with `*this` is *ready*, `std::future_status::timeout` if the time period specified by `relative_time` has elapsed.

Note

The thread may be blocked for longer than the specified duration. Where possible, the elapsed time is determined by a steady clock.

Throws

Nothing.

Std::Future::Wait_Until Member Function

Waits until the asynchronous result associated with an instance of `std::future` is ready or until a specified time period has elapsed.

Declaration

```
template<typename Clock,typename Duration>
future_status wait_until(
    std::chrono::time_point<Clock,Duration> const& absolute_time);
```

Preconditions
