Postconditions

The asynchronous result associated with `other` prior to the invocation of the constructor is associated with the newly constructed `std::shared_future` object. `other` has no associated asynchronous result.

Throws

Nothing.

Std::Shared_Future Copy Constructor

Constructs one `std::shared_future` object from another, so that both the source and the copy refer to the asynchronous result associated with the source `std::shared_future` object, if any.

Declaration

```
shared_future(shared_future const& other);
```

Effects

Constructs a new `std::shared_future` instance.

Postconditions

The asynchronous result associated with `other` prior to the invocation of the constructor is associated with the newly constructed `std::shared_future` object *and* `other`.

Throws

Nothing.

Std::Shared_Future Destructor
