Throws

Nothing.

Std::Packaged_Task::Get_Future Member Function

Retrieves a `std::future` instance for the asynchronous result associated with `*this`.

Declaration

```
std::future<ResultType> get_future();
```

Preconditions

`*this` has an associated asynchronous result.

Returns

A `std::future` instance for the asynchronous result associated with `*this`.

Throws

An exception of type `std::future_error` with an error code of `std::future_errc::future_already_retrieved` if a `std::future` has already been obtained for this asynchronous result through a prior call to `get_future()`.

Std::Packaged_Task::Reset Member Function

Associates a `std::packaged_task` instance with a new asynchronous result for the same task.

Declaration

```
void reset();
```
