Constructs a `std::recursive_mutex` object.

Declaration

```
recursive_mutex() noexcept;
```

Effects

Constructs a `std::recursive_mutex` instance.

Postconditions

The newly constructed `std::recursive_mutex` object is initially unlocked.

Throws

An exception of type `std::system_error` if unable to create a new `std::recursive_mutex` instance.

Std::Recursive_Mutex Destructor

Destroys a `std::recursive_mutex` object.

Declaration

```
~recursive_mutex();
```

Preconditions

`*this` must not be locked.

Effects

Destroys `*this`.

Throws
