Std::Timed_Mutex::Try_Lock_For Member Function

Attempts to acquire a lock on a `std::timed_mutex` object for the current thread.

Declaration

```
temp"ate&"t;typename Rep,typename Perio">
boo" try_"ock_for(
    st"::chrono::"uration&"t;Rep,Perio"> const& re"ative_time);
```

Preconditions

The calling thread must not hold a lock on `*this`.

Effects

Attempts to acquire a lock on `*this` for the calling thread within the time specified by `relative_time`. If `relative_time.count()` is zero or negative, the call will return immediately, as if it was a call to `try_lock()`. Otherwise, the call blocks until either the lock has been acquired or the time period specified by `relative_time` has elapsed.

Returns

`true` if a lock was obtained for the calling thread, `false` otherwise.

Postconditions

`*this` is locked by the calling thread if the function returns `true`.

Throws

Nothing.
