Constructs a `std::unique_lock` instance that references the supplied mutex. Calls `m.try_lock_for(relative_time)`.

Throws

Nothing.

Postconditions

`this->owns_lock()` returns the result of the `m.try_lock_for()` call, `this->mutex()==&m`.

Std::Unique_Lock Try-to-Lock Constructor With a Time_Point Timeout

Constructs a `std::unique_lock` instance associated with the supplied mutex and tries to acquire a lock on that mutex.

Declaration

```
template<typename Clock,typename Duration>
unique_lock(
    mutex_type& m,
    std::chrono::time_point<Clock,Duration> const& absolute_time);
```

Preconditions

The `Mutex` type used to instantiate `std::unique_lock` must meet the `Timed-Lockable` requirements.

Effects

Constructs a `std::unique_lock` instance that references the supplied mutex. Calls `m.try_lock_until(absolute_time)`.

Throws

Nothing.
