`this->joinable()` would return `true`.

Effects

Blocks the current thread until the thread of execution associated with `*this` has finished.

Postconditions

`this->get_id()==id()`. The thread of execution associated with `*this` prior to the call has finished.

Synchronization

The completion of the thread of execution associated with `*this` prior to the call happens-before the call to `join()` returns.

Throws

`std::system_error` if the effects can't be achieved or `this->joinable()` returns `false`.

Std::Thread::Detach Member Function

Detaches the thread of execution associated with `*this` to finish.

Declaration

```
void detach();
```

Preconditions

`this->joinable()` returns `true`.

Effects
