Throws

Nothing.

Std::This_Thread::Sleep_Until Nonmember Function

Suspends execution of the current thread until the specified time point has been reached.

Declaration

```
template<typename Clock,typename Duration>
void sleep_until(
    std::chrono::time_point<Clock,Duration> const& absolute_time);
```

Effects

Blocks the current thread until the specified `absolute_time` has been reached for the specified `Clock`.

Note

There's no guarantee as to how long the calling thread will be blocked for, only that `Clock::now()` returned a time equal to or later than `absolute_time` at the point at which the thread became unblocked.

Throws

Nothing.
