C++ Standard
  overhaul
  support for multithreaded programs
cache ping-pong, and performance
callable type
code reviews
  guidelines
  rubber chicken
Communicating Sequential Processes
  actor model
  and lack of shared data
compare-exchange functions.
    *See* atomic operation, compare-exchange functions.
constant expressions
  and constexpr
  and literal types
  array bounds
  in-class initializers
  nontype template parameters
  places that require them
  static initialization for aggregates
constexpr functions
  and constant expressions
  and mutex initialization
  and static initialization
    avoiding race conditions
  and templates
  constructors
    and static initialization
    trivial constructors
  member functions
    and virtual
    implied const
  no side effects
  not always constant expressions
  pure functions
