applying, identifying required relationships
fences
  example of ordering relaxed operations
  memory_order_acquire
  memory_order_release
  synchronizes-with
happens-before relationship
  and relaxed ordering
  and sequenced-before
  between push() and pop() on a queue
  between threads
  defined
  in a single-thread
  nonatomic operations
inter-thread happens-before relationship
  and synchronizes-with
  defined
lock() example memory ordering
memory ordering
memory ordering options
  and ordering models
  and varying costs with CPU architecture
  default
  default ordering
modification order
  and relaxed ordering
  defined
non-sequentially-consistent orderings
  and lack of agreement between threads
  and lack of global order
optimizing memory ordering
ordering constraints
relaxed ordering
  example
  example sequence
