and rvalue references
and rvalues
and std::thread
and std::unique_ptr
move constructors, example
moved-from state
of std::thread
move-only types
example
in the thread library
moving from an lvalue
multicore, 2nd
multiprocessor
multithreaded
multithreading
history
memory model
support in the C++11 standard
mutex
defined
lock
lock ownership, transferring
recursive
unlock
user-defined
example
example implementation, 2nd
requirements
using
mutual exclusion
