and std::future, 2nd, 3rd
compare to std::thread
comparison with std::packaged_task
example of passing arguments
exception propagation
exception safety
introduction
passing additional arguments
passing reference arguments with std::ref
reference
simple example
unsuitability for interdependent tasks
use for exception safety
vs. custom spawn_task function
vs. simple thread pools
vs. thread pools
std::atomic partial specialization for pointer types
arithmetic operators
memory ordering
return value
fetch_add() member function
example
memory ordering choices
return value
fetch_sub() member function
memory ordering choices
return value
std::atomic_signal_fence() nonmember function
std::atomic_thread_fence() nonmember function
std::atomic_xxx typedefs
std::atomic<bool>
assignment from bool
return type
compare_exchange_strong() member function
compare_exchange_weak() member function
loop to handle spurious failures
