- comparison with std::atomic_flag
- exchange() member function
- is_lock_free() member function
- load() member function
- store() member function

std::atomic<double>, and compare_exchange_strong

std::atomic<float>

- and compare_exchange_strong
- lack of arithmetic operations

std::chrono::duration

- and duration-base timeouts
- count() member function

std::chrono::duration_cast

std::chrono::high_resolution_clock

- definition
- potential relationship with std::chrono::steady_clock
- potential relationship with std::chrono::system_clock
- reference

std::chrono::steady_clock

- class definition
- duration member typedef
- now() static member function
- period member typedef
- reference
- rep member
- time_point member typedef

std::chrono::system_clock

- class definition
- reference
- time_t
  - conversion from time_t to time_point
  - conversion to time_t from time_point
- to_time_point() static member function, 2nd
- to_time_t() member function

std::chrono::system_clock::duration member, definition

std::chrono::system_clock::now member, definition
