std::chrono::system_clock::period member, definition
std::chrono::system_clock::rep member, definition
std::chrono::system_clock::time_point member, definition
std::condition_variable
and std::notify_all_at_thread_exit
and timeouts when waiting
class definition
default constructor
destructor
example
notify_all() member function, 2nd
and std::notify_all_at_thread_exit
relationship to wait
vs. notify_one
notify_one() member function, 2nd
calling outside a lock
relationship to wait
relationship with notify_all()
relationship with wait_for()
relationship with wait_until()
relationship with wait()
use in a thread-safe queue
use with a concurrent queue
vs. notify_all
reference
wait_for() member function, 2nd
and std::chrono::duration class template
and std::cv_status enum
and std::notify_all_at_thread_exit()
and std::unique_lock class template
with a predicate
wait_until() member function, 2nd
and std::chrono::time_point class template
and std::notify_all_at_thread_exit()
and std::unique_lock class template
with a predicate
