and std::future
and stored exceptions
example
get_future() member function
obtaining a future
set_exception() member function
set_value() member function, 2nd
using for test scheduling
std::queue
and thread safety
interface
potential for race conditions
std::ratio_add, reference
std::ratio_divide, reference
std::ratio_equal, reference
std::ratio_greater_equal, reference
std::ratio_greater, reference
std::ratio_less_equal, reference
std::ratio_less, reference
std::ratio_multiply, reference
std::ratio_not_equal, reference
std::ratio_subtract, reference
std::ref
passing reference arguments to std::async
std::result_of, getting task return types
std::shared_future
and shared ownership
and timeouts when waiting
conversion from std::future
separate copy per thread
spreadsheet example
using for test scheduling
vs. std::future
wait_for() member function
wait_until() member function
std::stack, interface
