List of Tables

Chapter 3. Sharing data between threads

Table 3.1. A possible ordering of operations on a stack from two threads

Chapter 4. Synchronizing concurrent operations

Table 4.1. Functions that accept timeouts

Chapter 5. The C++ memory model and operations on atomic types

Table 5.1. The alternative names for the standard atomic types and their corresponding std::atomic<> specializations

Table 5.2. The standard atomic typedefs and their corresponding built-in typedefs

Table 5.3. The operations available on atomic types

Appendix D. C++ Thread Library reference

Table D.1. Atomic typedefs and their corresponding std::atomic<> specializations
