Avr-libc library, 9
Axicom D2N V23105 relay, 208

B

Begin() function, 145, 148, 180, 189, 198
BeginTransmission() function, 199
Bildr.org, 219
Bipolar stepper schematic circuit, 163
Botanicalls device, 7–8
Breadboards
  basic LED circuit, 234
  hole pattern, 233
  internal connections, 233
  solderless breadboard, 233
Break statement, 59

C

Calling functions, 110
Camelback notation, 38
Case sensitive language, 31
Character arrays, 134
ChirpCycle, 67
ChirpPause, 67
Clear() function, 149
Close() function, 171
7-Color Blink
  schematic circuit, 33–34
  source code summary, 35–36
  uploading source code, 34–35
Comments, 22
  block comments, 22
  comment out, 22
  line comments, 22–23
Communication protocols, 211
Community engagement. *See* Community of makers
Community of makers, 5–6
  online forums, 215–216
  publishing your project, 217–219
Comparative/comparison operators, 52–53
CompareTags() function, 188
Compiler error, 30
Compiling, 27
Compound operators, 44
Conditional statements, 54–55
Connecting Arduino to USB port, 13–14
Constrain() function, 94
Continue statement, 60
CreateChar() function, 152–154

D

Data types
  boolean, 39–40
  byte, 39–40
  float, 39–40
  integer, 39–40
  long, 39–40
  numeric
    signed, 39
    unsigned, 39
Data.txt, 167
DC motor, 204
  schematic circuit, 205–209
Debouncing, 51
Decision machine
  schematic circuit, 122–123
  source code summary
    functions, 129–130
    inclusions and declarations, 127–128
    setup() and loop() functions, 128–129
  uploading source code, 124–127
Decision making, Arduino
  comparative operators
    assignment operator, 52–53
    comparison operator, 52–53
  control statements
    break statement, 59
    continue statement, 60
    do statement, 57–58
    for statement, 55–56
    if statement, 54–55
    switch statement, 58–59
    while statement, 56–57
  logical operators
    logical AND, 53–54
    logical NOT, 53–54
    logical OR, 53–54
