close() function, 171
file, 170
print() function, 172
read() function, 173–174
SD Flicker, 172–173
SD logger, 168–170
SD.begin() function, 170
SD.open() function, 170–171
write() function, 171
servo library, 156
attach() function, 159
reminder bell source code, 158–159
servo, 159
servo schematic circuit, 157, 158
write() function, 159–160
Sketch menu, 144
stepper library, 161
60-second sweep, 164
setSpeed() function, 165
step() function, 165–166
stepper, 164–165
Hardware list, Arduino, 11
Hardware starter kit, 10
H-bridges, 206
schematic circuit, 207
function, 208
HighChirp, 67–68
Hobby servo rotation, 157
HSB Color Mixer schematic circuit, 113–114
HSB color model, 103

I

If statement, 54–55
If…else statement, 73
Index, 130
INPUT pin, 70
Instructables, 217
Integer constant data type formatters, 96
Integrated circuit (I2C), 175
radio frequency identification (RFID) reader, 185
schematic circuit, 185–186
source code summary, 187–188
uploading source code, 186–187
serial time clock, 190
schematic circuit, 191
source code summary, 194–198
uploading source code, 192–194
SoftwareSerial library, 188
begin() function, 189
flush() function, 189
SoftwareSerial() function, 189
strcmp() function, 190
wire library, 198
begin() function, 198
beginTransmission() function, 199
endTransmission() function, 199
read() function, 200
requestFrom() function, 199–200
write() function, 199
Interrupt, 112
Interrupt service routine (ISR), 117
Iterative statements, 54
nJ
Jean-Claude Wippler, 138

K

Kicker, 138

L

LilyPad Arduino embroidery, 3
LiquidCrystal() function, 148
Local variable, 41
Logical operators
logical AND, 53, 54
logical NOT, 53, 54
logical OR, 53, 54
Loop() function, 21, 24, 54, 67, 68, 84, 128, 187

M

MakerBot CupCake 3D printer, 6, 7
Map() function, 93, 166
Memory, 121, 137
checking free RAM, 138
freeRAM() function, 138
freeRAM() usage, 138
kicker, 138
EEPROM, 137
