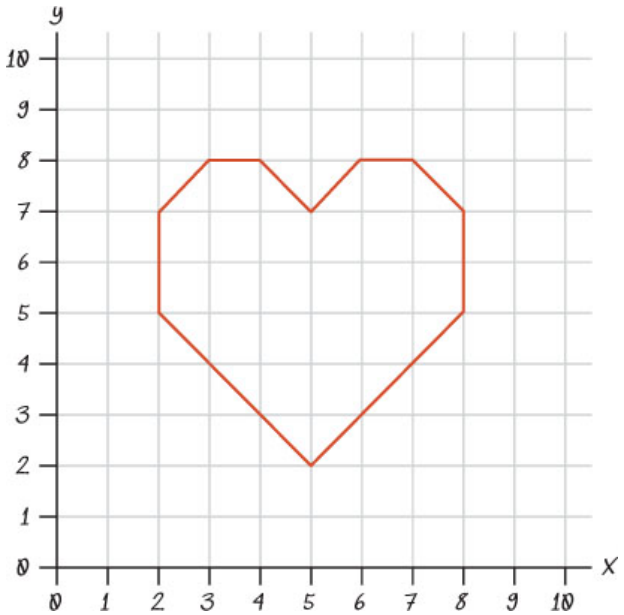
GRAPH CODE

A graph is a squared grid with numbers along the bottom (the x axis) and side (the y axis). The numbers line up with lines on the graph. You can mark a point on the graph using two numbers, one from each axis.

How to play

1 Draw a simple picture like this, with all the corners at points where lines cross. It should be a picture that you can draw as one continuous line.



2 Now mark all the corners and write them down in a list. For example, the first three in this picture are:
