

2 Now the players take turns picking up one or more pieces from the same row. You can take as many as you like, but they must all be from the same row.

3 The aim is to be the person who takes the last piece. That's all there is to it!

Game science

Mathematicians have spent ages studying how Nim works. When you play it a few times, you'll start to realize there are sneaky ways to make your opponent do what you want.
