THE FEWEST SQUARES

Here’s another game to play on graph paper. It might seem simple, but you could find yourself still puzzling over it several hours later!

What do you need?

- Graph paper
- Pen or pencil
- Ruler

You can do this on your own, work together with a friend, or challenge each other to a contest.

How to play

1 Draw a rectangular box on your graph paper using a pen or pencil and a ruler. It can be any size, but let’s start with an easy one—a rectangle that’s six squares wide and four squares high.
