HEX

To play the fantastic game of Hex, you need a special board made up of hexagons.

What do you need?

- Hex board (see left)
- Small counters of two different shades—about 25 of each.

Remember—a hexagon must have six sides.

Set it up

1 Hex is usually played on a diamond-shaped board with 11 hexagons along each side. Two opposite sides are one shade, and the other two are another shade. It looks like this:
