

The four hexagons at the corners belong to both sides.

2 You can copy this to make your own Hex board on a piece of cardboard, or if you have a computer and printer, you can find a blank Hex board online and print it out.

3 You also need lots of small counters in the same two shades that will fit on the spaces. Use plastic counters if you have any, or cut small counters out of cardboard (about 25 of each).
