
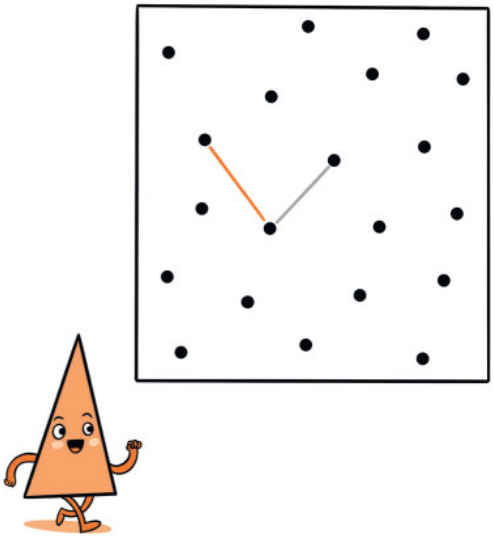
2 The players take turns playing. At each turn, a player must add a straight line connecting two dots, using their own pen, like this.



3 The aim is to use your lines to make complete triangles.

It doesn’t matter if you didn’t draw all the lines in the triangle—you just have to be the one to complete it.

Whenever you make a triangle, you can fill it in with your own pen. The triangles cannot overlap or have a dot inside.
