Now it's player 2's turn. They have a blue pen.

REMEMBER ...

If a triangle has been partly drawn by both players, no one loses. So, for example, this triangle is okay.

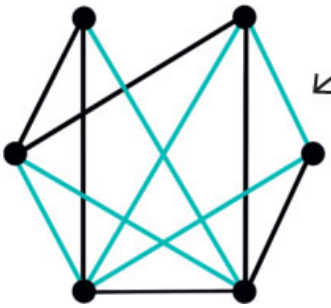

It's also okay if a triangle appears inside the hexagon and doesn't have a dot at all three corners, like this.

How long can you keep the game going?

It's all over ...

OOPS! Player 2 has made a triangle. All the sides are blue, and there's a dot at each corner. Player 1 wins!
