

How to play

2 The players choose Os or Xs, the same as in a game of tic-tac-toe (see page 82), then take turns playing.

3 When it’s your turn, choose a square and draw your symbol in it. Then use the pencil to lightly shade in all the squares around it to make a “block.”

4 The other player cannot put their symbol anywhere in your block. They have to choose an empty square. However, their block squares can overlap yours.
