Here’s a list of the first few square numbers to keep handy while you’re playing:

1	(1 x 1)
4	(2 x 2)
9	(3 x 3)
16	(4 x 4)
25	(5 x 5)
36	(6 x 6)
49	(7 x 7)
64	(8 x 8)
81	(9 x 9)
100	(10 x 10

1 is a square number as well!

SUBTRACT A SQUARE

1 Put any number of coins in a pile, then take turns playing.

2 When it’s your turn, you have to take away a square number of coins. So you could take away 1, 4, 9, or 16 coins —or even 100, if there are enough in the pile.
