What do you need?

- Cardboard thin enough to cut easily. White craft cardboard is best, but a cereal box or other cardboard box will work, too
- Pencil
- Ruler
- Scissors
- Tracing paper or parchment paper
- Markers in different shades

Set it up

1 First, make your hexagon tiles. You need about 20–30 tiles, or more if you like. Start by tracing this hexagon template onto tracing paper or parchment paper, using a pencil and ruler. Cut it out and use it to draw hexagons on your cardboard.
