***•11 •25 •40 •19 •3 •100 •29 •77 [etc]***

4 Before you erase the pencil lines, write down the numbers in the right order, like this.

***11***
***25***
***40***
***19***
***3***
***100***
***29***
***77***

5 Now turn each number into an equation. For example, the first number is 11. You could make this into 6 + 5.

***1. 6 + 5***
***2. 5 x 5***
***3. 10 x 4***
***4. 25 – 6***
***5. 12 ÷ 4***
***6. 10 x 10***
***7. 5 + 16 + 8***
***8. 7 x 11***
