6 To make a move, pick up a piece and make it jump over one of the pieces next to it, either horizontally or vertically, into an empty space. Then take the counter that was jumped over off the board.

To start with, there's only one empty space, so you'll have to jump into that one. But as more and more pieces get removed, you'll have more choices.

7 The aim is to remove all the pieces from the board except one.
