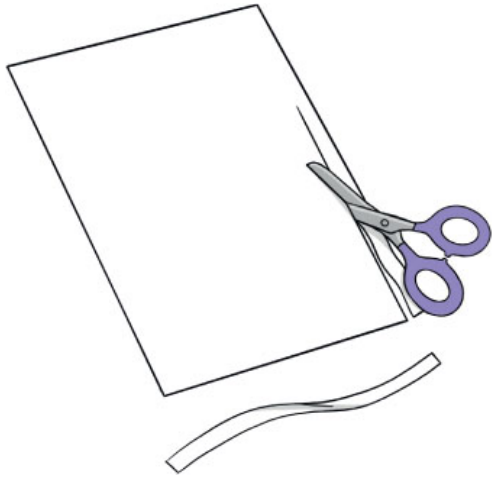
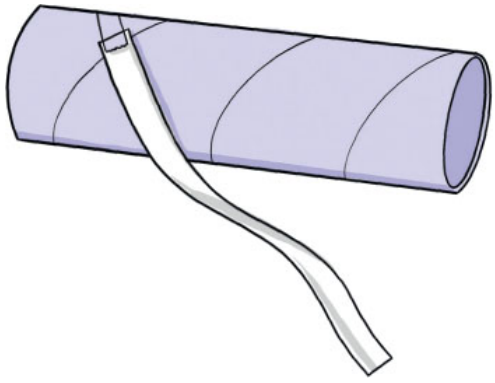
1 Cut some long, narrow strips of paper about 1–2 cm (0.5 in) wide. One way to make a strip like this is to cut all the way down one side of a piece of printer paper.



2 To make your coded message, take a long, cylinder-shaped object—here it’s a narrow tube from a roll of foil.

3 Tape the end of the strip of paper to one end of the cylinder.



4 Then wrap the strip around the tube in a neat spiral.
